## 100 MEN WANTED

On the island of Kauai, to wear **The Leader Clothing**. We sell the latest up-to-date goods at reasonable prices. And save you from 40 to 65 per cent. or every suit prices from \$10 to \$25.  
Mail orders promptly attended to.  
Wanted parties to sell and represent our goods on the island of Kauai.

## THE LEADER CLOTHIERS

FORT STREET, NEAR BERETANIA

## KAUAI'S TEMPLE OF FASHION

THE largest independent general merchandise store on Kauai. We take an immense amount of pride in this plain, solid statement. There is not a man on Kauai who does not know that when he buys anything at one of our stores the goods are going to be exactly as represented and the price a little lower than he can get anywhere else, and he knows, too, that he is going to get a square deal.

## Grocery Department

Quality counts. Yes, quality counts, every time. This is demonstrated in the rapidly increasing demand for our

### PURITAN BUTTER

the best butter ever made. Choice dairy butter. Butter so sweet and delicious in flavor that everybody wants it. Better get some; you'll find it far above the butter you get most places.

### CANNED VEGETABLES

Canned vegetables fresh from the garden. It really is delightful to have for dinner these days, vegetables like those we get in the early spring. Every can is guaranteed. That means bring it back and get your money if dissatisfied.

### TABLE DELICACIES

Table delicacies—bargains. Remarkable August and September offerings. Our table delicacies are the leading feature of our grocery department. They are of specially fine grade and are going at prices that would make them remarkable values even if they were of ordinary grades.

### OUR QUICK DELIVERY

A big, modern Buick truck, delivers your order in less time and in better condition than any other store on Kauai.

## Eleele Store

J. I. SILVA, Proprietor.

TRADE MARK REGISTERED  
THE ANVIL

Indicates a steel shod shoe for children. A substantial school shoe; a stylish well made dress shoe. High or low cut, Kid or Calf stock; button, one-strap, or lace.  
Steel shod anvil brand means "made to wear." Prices, in sizes 9 to 11, \$2.25 to \$2.50; in sizes 11 1/2 to 2, \$2.50 to \$3.00.  
Try a pair and prove what we contend.

## FATALITY OF TUBERCULOSIS

By Rev. J. M. Lydgate

"Tuberculosis is one of the oldest and most destructive diseases in the world. Four hundred years before Christ Hippocrates, a Greek physician, described it intelligently, and it has been with us ever since."

"While other diseases may be more dreaded, popularly, this is by far the most deadly. The annual mortality due to this cause in Germany is 100,000, in France 150,000, in the United States 150,000. Dr. Oliver Wendell Holmes once said that every other man or woman, you meet on the streets is, or will be, a tuberculosis victim."

"A few years ago the world was appalled at the terrible destruction of life in the Martinique disaster when 30,000 people were killed. Tuberculosis in the United States alone, carries off five times as many people EVERY YEAR."

"The American Civil War was one of the most destructive wars of modern times. It cost upwards of 160,000 lives in the four years of its course—a trifle more than the ANNUAL loss of life through tuberculosis in the United States to-day."

"While all life is valuable, it is not all equally so—at least from an economic point of view. There are various other diseases like Diphtheria—Scarlet Fever, Infantile paralysis etc., which take their victims from the ranks of childhood before economic value has been attained. Other diseases like Pneumonia and Paralysis, take their victims from the ranks of old age after economic value has ceased."

"But Tuberculosis gathers its victims from the productive period. The average value of an adult—the cost of care training education etc., may be taken as say \$1500 which is surely a very conservative figure. This is the capital stock, subscribed by the stock holders for every adult and is a liability to be returned gradually during the course of a life of usefulness. When an early death ensues, this capital is lost. The 150,000 premature deaths every year by Tuberculosis thus means a vast economic loss, to say nothing of the anxiety, the suffering and the grief involved. The Prudential Insurance Co. alone counts its annual loss through tuberculosis at \$800,000."

"This is a startling and gruesome picture, why delineate it? Because it may be ameliorated. Formerly the outlook was that of helpless pessimism. There was no hope, it was an incurable disease—one old Divine condemned all attempts at cure as blasphemy, defying the will of God 'for God has made it incurable.' Now, we know that it is curable, and what is more important, it is preventable. Koch's discovery of the Tubercle Bacillus a few years ago shed a blood of light on the whole subject and revolutionized the whole condition of things."

"It is better to call the disease communicable rather than contagious. The word contagion may wisely be reserved for such diseases as diphtheria, small pox, scarlet fever etc., where the infection is much quicker and perhaps by simple contact. Tuberculosis is not communicable in this immediate and rapid way—it takes time: it is slowly infectious—in one way, as regards the spread of the disease. This is a great advantage, it is less dangerous than other more contagious diseases—but in another way it is a disadvantage because people become indifferent to it and neglect the precautions which a more contagious disease would prompt. A few years ago there was epidemics of yellow fever in New Orleans."

"People were utterly demoralized, terrified nearly out of their senses, everything was paralyzed. The total death toll was less than 450. But quietly, without any fuss or alarm, tuberculosis takes 1000 lives every year from New Orleans and nobody thinks much about it."

"There are two factors essential to the existence and spread of this

disease in the world. The Seed and the Soil.

### THE SEED.

"Once there was no lantana here, and there could not be any until the seeds were brought. For many centuries there was no tuberculosis in Iceland—in spite of most favorable conditions for its existence and development. Finally the seeds of consumption were introduced and it spread rapidly. If it were possible to eliminate the seeds of tuberculosis we would thus eliminate the disease. But the seeds are everywhere and may not readily be eliminated."

### THE SOIL.

"To spring up and bear fruit, the seed must fall in good ground. Good ground for the sowing of tuberculosis seed means a condition of life or health which is below par or conducive to weakened vitality and impaired powers of resistance. Adverse conditions of life of various kinds—over crowding, bad sanitation poor ventilation, lack of sun and air—these are conditions doubly dangerous since they are favorable to the spread of tuberculosis directly, and indirectly they tend to undermine the general health and reduce the resisting power."

"The intemperate use of alcohol is in most countries a very significant factor in the spread of the disease. In France it is the cause of 41% of the cases of tuberculosis over-fatigue, over-exertion and worry are also prolific causes of tuberculosis."

### PREVENTIVE MEASURES.

"While it is a matter of great importance that tuberculosis is a curable disease, it is vastly more significant that it is a preventable disease. The time to cure consumption is before it begins."

"The efforts for prevention take two forms—the direct and the indirect. Practically the only source of danger in the spread of the disease is the sputum of the victim. If that could be eliminated the danger would be obviated. This, though very simple in theory, is not easy in practice. You can eliminate centers of lantana contagion on your ranch by digging them up and burning them, but you can't very well do that with human beings, their feelings have to be consulted in the matter, and as yet there is no sufficient compulsion of public opinion to enforce anything like serious measures. The first step to be taken accordingly is one of general education. To impress on people in every way possible, the dangers of tuberculosis, how it is contracted and how it may be avoided."

"Recently there was a great exhibition held in Washington, and then in New York, which aimed to teach in a graphic way many valuable lessons in connection with the subject. So large was the amount of the material used that 10 cars were required to transport it, and in the latter city alone over 750,000 persons visited it. By similar exhibitions elsewhere, by newspaper and magazine articles, by lectures and addresses as well as by the more direct education of the individual, very much has been done to stimulate public interest and enlighten public opinion. Concrete results are following in intelligent legislation, aimed at the care and control of the sources of infection."

"The indirect efforts at prevention are aimed at strengthening the defenses against the invasions of the disease, and necessarily assume protean forms, since whatever builds up the general health strengthens the defenses against disease and lessens the chances of contagion. Accordingly, every advance which improves the conditions of life, which insures better homes, better ventilation, more room more sun and air, better nourishment, shorter hours of service, more recreation, better moral and social conditions, more in-

## The Strongest Socks Made

They stand the rubs of the shoes and the wash board and we sell them at three pairs for a Dollar. Many Shades and Black and White.

**M. McInerny, Ltd.**

HONOLULU

## B. F. Ehlers & Co.

Sole Agents, Honolulu

## THE Caterpillar Engine

Lays its own track

A wonderful engine for plantation fields, etc. Send for illustrated catalogue.

**Honolulu Iron Works Company**

Agents for Hawaiian Islands.

telligence, higher vitality, in a word every ameliorating tendency, in whatever direction, is a nail in the coffin of tuberculosis and a fresh assurance of ultimate relief from the inroads of this dread disease. So manifold and effective are the agencies working in these various directions that in the aggregate, large results are being accomplished and the tuberculosis death rate, in most of the civilized countries of the world, is steadily being reduced and it seems increasingly reasonable to hope that in the near future this dread disease may be practically eliminated from the world's death roll."

## POST CARDS

In a large and choice assortment  
**Hawaii & South Seas Curio Co**  
Young Bldg., Honolulu.

## Passengers Arrived

The following passengers arrived on the Kinai last Wednesday, Sept. 12: Ah Yee and wife, Miss Daisy Sheldon, Miss Hannah Sheldon, Miss Anderson, Miss, Annie Ching, Miss Paschich, Miss Grace Chang, C. H. Herrick, Miss E. G. Wells, Miss Kreidler, Mrs. F. Cahill, David Kalau, Mr. Shinohara, A. De Santos, S. E. Wooley, Mrs. I. K. Hart, Miss Robords, J. Fasoth, D. Lieth, G. H. Fairchild and wife, Mrs. J. K. Soper, Miss B. Soper, Mr. Jos. Bush and wife, D. Conway, Dr. Glaisyer, E. B. Bridgewater, Miss Carlotta Stewart, Mrs. C. B. Hudson and two children, Miss E. Aholo, Mrs. Iona, J. K. Kaeo, Miss Ettie Lee, Miss Mary Ann Huddy, Miss H. Sato, Miss Gardner, Miss E. Ayer, Miss Mildred, Y. Akau.

C. H. Herrick, representing Schuman & Co., arrived on Kinai Wednesday.
